

### 100% solid wood

When you choose WEX Trade, you choose the finest quality products made from nothing less than 100% solid wood. Our strong environmental policy ensures our wood is sustainably sourced and that excellence is assured.

### Carefully chosen

We are solid wood specialists. As such, we have sourced the best solid oak for our collection, creating uniquely elegant, resilient cabinets. With WEX Trade you won't find oak frames and chipboard centre panels: quite simply, when we say solid, we mean solid! It's our belief that the benefits of solid wood surpass what manmade materials can offer – once you've explored our full range of affordable oak kitchen cabinets, we're sure you will agree.

### Carefully crafted

WEX Trade cabinets are manufactured in Europe using the highest quality CNC machinery and can be purchased with or without frontals. All are finished to an extremely high standard; the cabinet panels themselves are subject to an intensive three-coat lacquering process while the frontals can be customised to your preference with a choice of finishing options (sanded, lacquered or hand-painted in a selection of Farrow & Ball colours). Such attention to detail is an essential and unique element of the WEX Trade service; as such, we also offer a full sample service so customers can sample products before committing to purchase.

Welcome to the incomparable beauty of solid wood.  
Welcome to WEX Trade.

A beautiful kitchen is easy to achieve with WEX Trade products. Please read on to learn more about the stunning cabinet and frontal options we can offer.

## Solid Oak Cabinetry

For a superb balance of elegance and resilience, look no further than the WEX Trade cabinet range.

Our cabinets are manufactured solely in Europe from 18mm solid oak panels (40mm staves) using innovative German CNC machinery. The panels are finger-jointed and high-pressure glued for maximum stability, and are fully sanded to 150 grit with a 3mm edge profile before finishing with an intensive three-coat lacquering process. The lacquered finish provides excellent protection against potential damage from heat, liquid and other abrasive materials.

All our solid oak cabinetry is pre-assembled as standard.

We manufacture cabinet carcasses in a comprehensive range of combinations: base, wall, full height and specialist; with various drawer options; with or without doors (please read on for more information on doors, drawers and specialist cabinet options). Premium Blum fixings contribute to the overall durability of the cabinet, ensuring that the components are as hard-wearing as the oak itself.

We are passionate about solid wood. As such, a strict adherence to environmental regulation is fundamental to our operation. Our European oak is sustainably sourced from forests with established replanting schemes and the vast majority of our timber is purchased from FSC-certified sources. By utilising cutting-edge manufacturing techniques (such as fingerjointing) and recycling any 'leftovers' or offcuts into samples or smaller panels, we keep wastage to an absolute minimum.

Traditional (Sanded)

Traditional (Lacquered)

Traditional (Painted)

## Traditional

Our cabinet doors are constructed from the highest quality solid European oak. Better still, this exceptional product can be enjoyed without breaking the bank – available at similar prices to many doors on the market which consist of solid oak frames with inferior chipboard centre panels.

Available in two natural finishes - sanded or lacquered - or hand painted in the Farrow & Ball colour of your choice, we offer a wide selection of finishes in two primary designs: solid oak 'Traditional' or the solid oak 'Shaker' option.

WEX Trade 'Traditional' frontals are designed in a popular farmhouse style, with the textured frame giving an elegant yet inviting look – perfect for the country kitchen when paired with a classic colour palette and a solid wood worktop. This door is manufactured to a pleasantly chunky thickness of 22mm.

Shaker (Sanded)

Shaker (Lacquered)

Shaker (Painted)

## Shaker

These frontals capture the simple elegance of the 'Shaker' movement, resulting in a product that is both high quality and full of charm. Featuring a subtle, unadorned timber frame around a solid oak centre panel, the door is manufactured to a thickness of 20mm for a reassuringly substantial feel.

As with our 'Traditional' option, we can supply these doors in a choice of finishes: sanded, lacquered or handpainted in colours from Farrow & Ball.

## Choice of Finishes

We offer our customers an extensive selection of finishes that are perfect for solid oak frontals.

The Timeless range is a collection of our most popular finishes for frontals. These include our sanded and lacquered options alongside a selection of our best-selling paint shades from Farrow & Ball. To achieve a natural-looking finish, our lacquered frontals are treated in a similar manner to the cabinets themselves, creating a seamless look that perfectly matches the carcass. With our sanded option, frontals are left unfinished so that you may apply your choice of treatment at your own convenience. We ensure these favoured finishes are available at all times, so that we can deliver as promptly as possible.

If you have another shade in mind, our extended range offers any colour from Farrow & Ball's impressive collection of more than 130 paints. As we will need to source your chosen shade, lead times may be slightly longer (though still market-leading) and will incur a small surcharge.

Whichever colour you choose, all our frontals are subject to a detailed finishing process to ensure remarkable consistency without detracting from the innate qualities of the timber. As such, we always apply the final coat by hand, to accentuate the oak's natural grain pattern.

## Glazed

A recent addition to our collection, the glazed door option brings a new dimension to the WEX Trade cabinetry range.

Glazed options are available for both frontal styles: 'Traditional' or 'Shaker'. The use of glass panes enhances the look of cabinetry in any kitchen, and beautifully showcases decorative dishware whilst keeping dust out.

WEX Trade glazed frontals promote safety as well as style. Our glass is toughened solely in Europe and is rated at BS 6206 CL-A – Class A. This grade represents the highest rating in the British European Safety Standard tests and is only awarded to exceedingly durable glass.

## Drawers

For a fantastic combination of natural appeal and modern technology, look no further than the WEX Trade drawer range.

Designed specifically to fit within our elegant solid oak cabinets, we supply soft-close drawers in a variety of widths and combinations for affordable prices, negating the need for pricey bespoke units.

Our wooden kitchen drawers are constructed from solid oak backs and bases with Blum BLUMOTION runners, mechanisms and even drawer sides. Moreover, the innovative lacquer finish – a similar process to that which we apply to our cabinets – produces a hard-wearing drawer surface that is easy to clean and maintain.

## Tandembox Antaro and Intivo

To ensure there is a drawer option to suit every budget, we offer four styles: Tandembox Antaro (Grey), Intivo (Silk White), Intivo (Terra Black) and Tandembox Antaro (Stainless Steel).

Tandembox Antaro merges minimalist design with unbeatable quality. Our grey option features a powder-coated steel frame, whilst pan drawers benefit from the addition of attractive oak side panels. For a highly luxurious option, customers can choose to upgrade to a stainless steel frame, which comes with a stunning polished finish that beautifully complements stainless steel kitchen hardware.

Our deluxe Intivo collection offers drawers finished with a Silk White or Terra Black frame, creating a fantastic contrast with the solid oak panels. For pan drawers, we also provide oak inserts, for a seamless, stunning look.

## Specialist Cabinetry

To complement our comprehensive collection of standard cabinets, we provide several specialist options also manufactured from the best 18mm thick European oak. This range encompasses Belfast sink cabinets, oven housing units, wine racks, open-end cabinets, curved units and corner solution cabinets. We also stock bridging units and bifold frontals.

In addition to our 'Shaker' and 'Traditional' frontals, WEX Trade is also pleased to offer a stunning in-frame design. This style is only painted to order and, as such, incurs a slightly longer lead time. If you are interested to find out more about this range, or you would like a quote for your current project, please get in touch and a member of our sales team will be happy to discuss your requirements. Due to the nature of its construction, this style is only available pre-assembled.

As with the whole WEX Trade cabinet collection, these units are composed from solid timber: the merits of which cannot be overstated. In this instance, the usage of a superior material not only delivers wonderful value for money, but also negates the need for potentially costly extras such as end panels and filler panels.

Just like our standard range, these cabinets are pre-assembled as standard.

## Accessories

We like to think of our accessories range as the 'cherry on top': that last hint of sparkle that can take a kitchen from special to sublime.

Our solid oak pilasters, cornices and pelmets are available in a variety of options and provide a fantastic finishing touch to a cabinet run, smoothing the lines of your kitchen as effectively as a well-chosen plinth or upstand (we can supply those, too!). Exquisite solid wood cutlery inserts, chopping boards and a variety of handles – specifically selected to complement our cabinets – are also on offer.

To help install and maintain our products, WEX Trade can recommend a selection of accessories including stainless steel hot rods, moisture barriers and our preferred brand of oil.
